EDUCATION

- 2017 Ph.D Biology, University of New Mexico (with distinction, *Advisor: Joseph Cook*)
Pattern and Process in the Radiation of Ground-dwelling Squirrels
- 2011 M.S. Biology, University of North Carolina Wilmington (*Advisor: Steven Emslie*)
Late Quaternary Paleoecology of Two High-Elevation Mammal Species from the Southern Rocky Mountains, Colorado
- 2004 B.S. Biology, Appalachian State University

RESEARCH FOCI

Evolution & ecology of mammals, phylogenetics, life history, seasonal plasticity, biodiversity informatics, specimen-based research

APPOINTMENTS

- University of North Carolina Greensboro, Department of Biology
2019 - present Assistant Professor and Curator of Biodiversity Collections
- University of Florida, Florida Museum of Natural History
2018 - 2019 NSF Postdoctoral Fellow (*Sponsors: Rob Guralnick, David Blackburn, David Reed*)
2017 - 2018 Postdoctoral Associate
- University of New Mexico, Museum of Southwestern Biology
2018 - present Research Assistant Professor
2014 Curatorial Assistant, Division of Mammals
2011 - 2014 Curatorial Assistant, Division of Genomic Resources
- Smithsonian Institution, National Museum of Natural History
2015 Peter Buck Predoctoral Fellow (*Sponsors: Kristofer Helgen, Gene Hunt*)

FUNDING AND AWARDS (to date >\$4.75 million)

- 2022 **National Science Foundation** (DBI)
BRC-BIO: Flexible traits and functional trade-offs: an integrated analysis of gastrointestinal plasticity in mammals (\$502,203, sole PI)
- 2022 **National Science Foundation** (DBI)
Collaborative Research: Ranges: Building Capacity to Extend Mammal Specimens from Western North America (\$2,600,000, lead PI, 21 participant institutions)
- 2022 **UNCG College of Art and Sciences**, Proposal Preparation Program (P3) (\$3,000)
- 2021 **National Science Foundation** (DEB)
Collaborative Research: STEPP-NET: Steppe Parasite Networks (\$850,000, lead PI)
Career-Life Balance Supplement to STEPP-NET (\$46,808, co-lead PI)
- 2021 **National Science Foundation** (DBI)
MRI: Acquisition of Micro-computed Tomography and 3D Imaging Infrastructure for Interdisciplinary STEM Research in North Carolina (\$918,417 [NSF portion = \$642,892], lead PI)
- 2018 **National Science Foundation** (DEB), Postdoctoral Research Fellowship in Biology
Linking processes of speciation and extreme genital evolution: a multi-clade comparison in squirrels (\$138,000, lead PI)
- 2016 **United States Fish and Wildlife Service**, Candidate Conservation Fund
*Distribution and Population Connectivity of Merriam's Ground Squirrel (*U. canus vigilis*)* (\$10,000)
- 2016 **American Society of Mammalogists**, ASM Fellowship
Pattern and process in the radiation of ground-dwelling squirrels (\$7,500)
- 2015 **National Museum of Natural History**, Peter Buck Predoctoral Fellowship
Finding common ground: towards a timescale for analyzing the radiation of ground-dwelling squirrels (\$32,000)

- 2015 **American Museum of Natural History**, Theodore Roosevelt Memorial Grant (\$2,275)
 2014 **American Society of Mammalogists**, Grant-in-Aid of Research (\$2,000)
 2014 **American Society of Mammalogists**, Elizabeth Horner Award (\$500)
 *** \$21,950 in additional research and travel support since 2010

2016 Evolution: “Molecular Phylogenetics” (Guest Lecture)

SERVICE

Biocollections Development and Digitization · Specimen-based inquiry is a core of my research and teaching program, and I am committed to building and digitizing natural history collections for future biodiversity scientists. Since 2006, I have led or participated in national and international field expeditions resulting in >11,500 vouchers (most with associated tissues and/or parasites), deposited in U.S. museums. I currently curate the UNCG Mammal Collection, a regional collection representing NC and the Southern Appalachians which is 100% digitized and globally discoverable via the Arctos multi-collection database and standard biodiversity data aggregators.

Student Mentorship · I have mentored 7 graduate students since 2019 (all at UNCG), each of whom executed independent research projects. I have also mentored 28 undergraduate students since 2006 (18 at UNCG), including 11 women and 7 URMs in STEM. My goal is to open the “black box” of specimen-based research for students and give them a platform to answer their own questions about biodiversity. To that end, I have mentored students in field methods (small mammal trapping and sampling), specimen preparation and curatorial methods, wet lab methods (DNA extraction, sequencing), data analysis, and biodiversity informatics.

Federal Grant Review · I have participated in 10 federal grant panels or ad hoc reviews since 2019: *NSF Division of Integrative Organismal Systems (2022)*; *NSF Division of Biological Infrastructure (2022)*; *NSF Division of Environmental Biology (2021,2022)*; *NSF Postdoctoral Research Fellowships in Biology (2023)*; *NSF Graduate Research Fellowship (2019,2020,2021,2022)*; *European Research Council (2023)*.

Peer Review · I have reviewed manuscripts for 18 journals since 2017: *Biological Conservation*; *Biological Journal of the Linnaean Society*; *Conservation Genetics Resources*; *Diversity and Distributions*; *Ecography*; *Ecology and Evolution*; *Journal of Animal Ecology*; *Journal of Mammalogy*; *Journal of Zoological Systematics and Evolutionary Research*; *Mammalia*; *Methods in Ecology and Evolution*; *Molecular Phylogenetics and Evolution*; *Occasional Papers of the Museum (Texas Tech University)*; *Paleogeography, Paleoclimatology, Paleoecology*; *PloS Neglected Tropical Diseases*; *PloS One*; *Scientific Communications*; *Systematic Biology*

Society Service · I serve on committees of the American Society of Mammalogists (*Systematic Collections Committee, 2013-present*) and as a society grant reviewer (*American Society of Mammalogists, Grants-in-Aid of Research, 2018,2019,2020,2021,2022*; *Society of Systematic Biologists, Graduate Research Fellowships 2018,2019*).
